Exam 1 Statistics
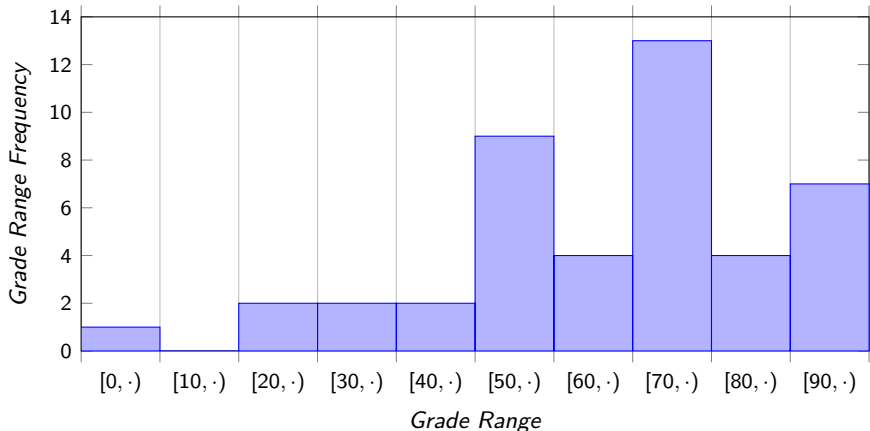

- **Count**: 44
- **Maximum**: 100 (2 students: **Kennet and Yat**) — I was wrong (twice) and I'm happy about it!
- **Median**: 70.50
- **Standard Deviation**: 21.06
- **Average**: 67.04

Comments

- In general, the class did really well on a relatively long exam

- Students who scored lower than $Avg - StdDev = 67 - 21 = 46/100$ should come and see me in my office

- Other students are more welcome to come and talk to me about their exam results

- The standard deviation was a bit high — we wanna work on making it smaller

- Exam II will be a bit shorter

- Performance in Exam II and Final can nullify Exam I results
