Tips & Tricks for Searching IEEE Xplore

Jalyn Kelley

IEEE Client Services Manager

Friday, January 26, 2018, 2:00pm – 2:50pm, Location: BB 3.03.24

Abstract

This introduction to IEEE and the IEEE Xplore Digital Library will cover: timesaving search techniques for finding technology content; how to easily download equations and figures from HTML articles; stay current by setting-up saved search alerts and Table of Content alerts; find best papers by using "sort by Most Cited"; download citations into bibliographic management systems; locate information on new product technologies, related patents, companies, or organizations using author affiliation; tips on how to select an appropriate IEEE periodical or conference to submit your manuscript; resources available in the IEEE Author Center, and much more.

Biography

Jalyn Kelley is an IEEE Client Services Manager, providing training and support to IEEE Xplore customers in the central and southern U.S. Prior to joining IEEE, Jalyn spent seven years as a Research Analyst at Computer Sciences Corporation (CSC) providing strategic market and technical research to IT specialists in the field. Jalyn has also worked as an Assistant Editor of Information Services at the San Antonio Express-News and she received a Master of Information Science from the University of Texas at Austin.
